**V. Read the passage and answer the questions given: - 3 marks**

Books are great treasure house of knowledge. They are the living examples of man's march on the path to higher and higher civilisation. The great men who died long ago, live in their books. We feel their very personality and existence when we read their books. We feel as if they were conversing with us.

Books not only store civilization but also carry it forward. All coming generations get the light of knowledge from the books written by their ancestors and try to improve upon that knowledge. Civilization cannot make much headway in a country where there are not many great books. We get through books the latest knowledge in the fields of arts, science, commerce, etc. This knowledge is helpful to us and enables us to achieve success in the field of our choice.

Books are never failing friends. They never desert us, not even when all fair-weather friends have deserted us. They dispel the dark clouds of gloom from our minds and increase our happiness if we are already happy. Through the ages, the scriptures and other great books have provided immeasurable solace to the wounded and strife-torn humanity.

There may be books prescribed for some course or profession, but then there are books for general study. The books of literature- poetry, drama, novel, short stories, etc., are generally highly thrilling and inspiring if they are written by a good author. There may be tragic, comical or humorous books. The question is that of an individual's choice.

To be a lover of books, though not be bookworm, is a sign of good luck. A voracious reader gets much more pleasure from reading books than a miser gets in hoarding money. The knowledge embedded in books is valueless; so is pleasure obtained from reading them. A good book absorbs the whole spirit of man; the reader's pleasure is indescribable.

1. Which of the following, according to the passage, is not true about books?  
A. They are source of inspiration  
B. They are source of knowledge  
C. They are source of happiness  
D. They are means of livelihood

- A. Based on earlier books new knowledge is obtained
  - B. The books provide solution to many problems
  - C. The books inspire the scientists
  - D. Not mentioned in the passage
3. The high quality of books produced by a country indicates:
- A. it has a high rate of literacy
  - B. it has a progressive civilization
  - C. it is not an industrialise nation
  - D. it has learned ancestors

**VI. Read the passage and answer the questions given: - 3 marks**

I do not suggest that the cultural side of education should be ignored. On the contrary, I think, it is essential to the production of the sort of adult who best fits the modern world. But I think that what is important in cultural education should be conveyed, at any rate in the early stages, by methods far more attractive than those now usual. History and Geography should be taught at first by means of the cinema. When taught this way, they will give pleasure; attention will be spontaneous and therefore the impression will be less temporary.

In spite of reforming movements, there is still among educators a feeling that what is enjoyed without effort cannot have much educational value. I would have children made aware of the manners and customs of tribes and nations utterly remote from their own. Education conducted on these lines would do more than many books to cure provincialism in space and time and to make children realise that actual human beings with actual feelings can be outwardly very different from the people among whom they live, but inwardly composed of the same human material. A zulu would not appear strange, remote or savage but one like themselves.

1. The writer criticised traditional educators for not
- A. Using cinema as a method of teaching
  - B. Making learning an enjoyable activity
  - C. Imparting information about remote tribes
  - D. Imparting information about various cultures

2. The writer thinks that the cultural side of education is needed to make man

- A. Appreciate one's heritage
- B. Appreciate other civilisations
- C. Suitable for modern civilisation
- D. Admire his environment

3. The expression "to cure provincialism in space and time" means to get rid of

- A. Regional Feelings
- B. Obscure ideas
- C. Narrow views
- D. Selfish opinions
