- 12. The original layout known as plano pilots in Brasilia has been protected by strict zoning and in 1987, it was placed in the UNESCO world heritage list. This has lead to
  - (i) Brasilia has a low density centre in contrast to other cities in Brazil
  - (ii) Forced poorer residents to seek accommodation beyond the city core.
  - (iii) Resulted in lower transport costs
  - (i) and (ii) only
  - (B) (ii) and (iii) only
  - (C) (i) and (iii) only
  - (D) (i), (ii) and (iii) only
  - (E) Answer not known
- 13. Who introduced the theory of location where the cost of transporting the raw materials to the plant and finished products to the market greatly influences the location of a plant?
  - Alfred Weber

(B) Alfred Marshall

(C) Adam Smith

- (D) Robbins
- (E) Answer not known
- 14. The law of diminishing returns in specially and quickly applicable to agriculture and other extractive occupation because of the following:
  - (i) Agriculture is dependent on nature
  - (ii) The time lag between input and output is very small in agricultural production
  - (iii) Agricultural labour does not have work continuously
  - (iv) Soil does not get exhausted and fertility is not lost
  - (i) and (iii)
    - (B) (ii) and (iv)
    - (C) (ii)
  - (D) (iv) and (iii)
  - (E) Answer not known

| 15. | When the | national | income | is | expressed | in | terms | current | prices, | it | is |

| 22. | The  | components of environment include  |
|-----|------|--|
|     | (A)  | Biotic components  |
|     | (B)  | Abiotic components   |
|     | 40)  | Biotic and abiotic components  |
|     | (D)  | Inert gases  |
|     | (E)  | Answer not known   |
| 23. |      | volumetric concentrations of pollutants are measured and computed hass emissions in —————————————————————————————————— |
|     | (A)  | gram/km  |
|     | (B)  | ml/km  |
|     | (C)  | gram/square metre  |
|     | (D)  | gram/cubic metre   |
|     | (E)  | Answer not known   |
| 24. | A fo | od chain   |
|     | (A)  | is transfer of energy from one organism to another   |
|     | (B)  | is a relationship between different producers  |
|     | (C)  | is a combination of organisms at different levels  |
|     | (D)  | is comprising of any three organisms   |
|     | (E)  | Answer not known   |
| 25. |      | a PPP mode of development of an urban infrastructure project, the rests of the public entity is                        |
| •   | (A)  | Presence of transparent laws/regulations   |
|     | (B)  | Fair allocation of risks between the public entity and the private partner   |
|     | (0)  | Continuity in service delivery, which benefits the community   |
|     | (D)  | Stability in the political and economic environment  |
|     | (E)  | Answer not known   |

- 26. If Q is the total quantity of water in litres required by a community per year having P as its population, then the per capita consumption or demand in litres per capita per day is given as \_\_\_\_\_\_.
  - $Q = \frac{Q}{P \times 365}$
  - (B)  $\frac{P}{Q \times 365}$
  - (C)  $\frac{365 \times Q}{P}$
  - (D)  $\frac{365 \times P}{Q}$
  - (E) Answer not known
- 27. For Run-off co-efficient of park and undeveloped areas, the percentage of imperviousness as given by NDMA is
  - (A) 10-20%
  - (B) 70-90%
  - (C) 50-60%
  - (D) 80-90%
  - (E) Answer not known
- 28. Biological decomposition of Putrescible organic matter in solid waste is digested anaerobically and converted into humus and stable mineral compounds in
  - (A) Composting
    - (B) Incineration
  - (C) Pyrolysis
  - (D) Source segregation
  - (E) Answer not known

The ratio between Net profit and Net sales is 29. Gross profit margin (A) (B) Gross profit (C) Net Profit Net profit margin Answer not known (E) The most popular risk assessment technique is 30. Financial ratio analysis (A) Sensitivity analysis Economic analysis (C) Cost analysis (D) Answer not known (E) Name the term where the content is drafted by an engineer contains 31. brief and adequate description of the required work and publicity advertised in the newspaper. Tender notice Tender document (B) (C) Tender agreement Contract Document (D)

Answer not known

(E)

| 32. | Ide  | ntify the Quantifiable project from the following sectors   |
|-----|------|---|
|     | (A)  | Defence   |
|     | (B)  | Education   |
|     | .(C) | Health  |

|     | (E)  | Answer not known  |
|     | ,    |   |
| 36. | Acco | ording to 74th CAA Nagar Panchayats are   |
|     | (A)  | Smart Cities  |
|     | (B)  | Larger Urban Areas  |
|     | (C)  | Rural hamlet  |
|     | (D)  | Transition from rural to urban area   |
|     | (E)  | Answer not known  |
| 37. |      | mean a line which is in rear of the street alignment  |
|     | and  | to which the main wall of a building abutting on a street may   |
|     | lawi | fully extend.   |
|     | (A)  | Rear line   |
| ,   | (B)  | Building line   |
|     | (C)  | Set back  |
|     | (D)  | Side set back   |
|     | (E)  | Answer not known  |

- 38. Name the first planning legislation in India before Independence
  - (A) Sanitary Commission (1864)
  - (B) Bombay Improvement Trust (1898)
  - (C) Mysore Improvement Trust (1903)
  - (D) Calcutta Improvement Trust (1911)
  - (E) Answer not known
- 39. The world's first National Planning Law was
  - (A) United Kingdom's 1909 Housing, Town Planning, etc., Act
  - (B) New York 1893 Housing and Town Planning Act
  - (C) Chennai City Improvement Trust, 1921
  - (D) London Town Planning Act, 1901
  - (E) Answer not known
- 40. Government of India issued NUTP in 2006, to bring about comprehensive improvements urban in transport services and infrastructure – What does NUTP stands for
  - (A) National Urban Transit Policy
  - National Urban Transport Policy
  - (C) National Urban Traffic Policy
  - (D) National Urban Trip Policy
  - (E) Answer not known

| The I   | Light Rail Transit (LRT) has the following advantages               |   |
|---------|---|---|
| (i) I   | Relatively cheaper than conventional suburban rail system           |   |
| (ii) I  | Free from pollution caused by motor vehicles                        |   |
| (iii) S | Suitable for pedestrian zones.                                      |   |
| (A)     | (i), (ii), (iii)  |   |
| (B)     | (i), (ii)   |   |
| (C)     | (ii), (iii)   |   |
| (D)     | (i)   |   |
| (E)     | Answer not known  |   |
|         |   |   |
| A rac   | dar speedometer records   |   |
| (A)     | Lag   |   |
| (B)     | Instantaneous speed   |   |
| (C)     | Speed timid over a long distance                                    |   |
| (D)     | Speed timid over a short distance                                   |   |
| (E)     | Answer not known  |   |
|         |   |   |
| The     | minimum gradient of about — % is needed to ensure                   | e   |
| effec   | tive drainage of carriage ways with kerbs on flat urban roads       |   |
| (A)     | 0.75  |   |
| (B)     | 0.25  |   |
| 40      | 0.5   |   |
| (D)     | 1   |   |
| (E)     | Answer not known  |   |
|         | (i) I (ii) I (iii) S (A) (B) (C) (D) (E) The effect (A) (B) (D) (D) | <ul> <li>(ii) Free from pollution caused by motor vehicles</li> <li>(iii) Suitable for pedestrian zones.</li> <li>(i), (ii), (iii)</li> <li>(B) (i), (ii)</li> <li>(C) (ii), (iii)</li> <li>(D) (i)</li> <li>(E) Answer not known</li> <li>A radar speedometer records</li> <li>(A) Lag</li> <li>(B) Instantaneous speed</li> <li>(C) Speed timid over a long distance</li> <li>(D) Speed timid over a short distance</li> <li>(E) Answer not known</li> <li>The minimum gradient of about ————————————————————————————————————</li></ul> |

| 44. |             | commended design speed for arterial roads of urban area by Indian<br>ds congress is |
|-----|-------------|---|
|     | (A)         | 80 kmph   |
|     | (B)         | 60 kmph   |
|     | (C)         | 50 kmph   |
|     | (D)         | 30 kmph   |
|     | (E)         | Answer not known  |
| 45. | Lev         | rel of services (LOS) index is recorded as  |
|     | (A)         | Seat miles per sq. mile   |
|     | (B)         | Service miles per sq. mile  |
|     | (C)         | Route miles per sq. mile  |
|     | (D)         | Transit miles per sq. mile  |
|     | (E)         | Answer not known  |
| 46. | Sate<br>upd | ellite imagery is a vital source of ———————————————————————————————————             |
|     | (A)         | Global, outdated and reliable information   |
|     | (B)         | Regional outdated and reliable information  |
|     | (C)         | Local, updated and unreliable information   |
|     | (D)         | Global, frequently update and reliable information                                  |
|     | (E)         | Answer not known  |
| 47. | Pola        | rised light is used in  |
|     | (A)         | Anaglyphs   |
|     | (B)         | Stereophotos  |
|     | 40)         | Nectographs   |
|     | (D)         | Infrared photos   |

(E) Answer not known

| 48. | Iden<br>(i)  | ntify the correct statement from the following  GPS surveying can be carried out without clear line of sight between stations |  |  |  |  |
|-----|--|---|--|--|--|--|
|     | (ii)<br>(iii)<br>(iv)  | GPS surveying can be carried out at night   |  |  |  |  |
|     | (A)<br>(C)<br>(E)  | (ii), (iii) and (iv) (i), (ii) and (iv)   |  |  |  |  |
| 49. | (A)  |   |  |  |  |  |
|     | (B)  | Space, time and resolution  |  |  |  |  |
|     | (C)  |   |  |  |  |  |
|     | (D)  | <del>-</del>  |  |  |  |  |
|     | (E)  | Answer not known  |  |  |  |  |
| 50. | In Electro magnetic remote sensing process, identify the correct<br>sequence of steps from the following in relation to data acquisition and<br>analysis |   |  |  |  |  |
|     | 1.   | Energy interaction with earth's surface   |  |  |  |  |
|     | 2.   | Energy sources  |  |  |  |  |
|     | 3.   | Generation of sensor data in the form of pictures   |  |  |  |  |
|     | 4.   | Air borne/space borne sensors to record the reflected energy  |  |  |  |  |
|     | 5.   | Propagation of energy through the atmosphere  |  |  |  |  |
|     | (1)  | 2-5-1-4-3 (B) 2-4-5-3-1   |  |  |  |  |
|     | (C)  | 3-5-4-2-1 (D) 3-5-1-4-2   |  |  |  |  |
|     | (E)  | Answer not known  |  |  |  |  |
| 51. |  | is the important segment of Indian Space Research   |  |  |  |  |
| 01. | Org  | anization (ISRO) with the mandate of providing Earth Observation  |  |  |  |  |
|     |  | ) data from space and aerial platforms to user's.   |  |  |  |  |
| , , | (A)  | National Remote Sensing Centre (NRSC)   |  |  |  |  |
|     | (B)  | Survey of India (SOI)   |  |  |  |  |
|     | (C)  | Aerial Photography Transaction Registry (APTR)  |  |  |  |  |
|     | (D)  | Air Survey Company (ASC)  |  |  |  |  |
|     | (E)  | Answer not known  |  |  |  |  |
|     | . ,  |   |  |  |  |  |

| 52. |      | ———— was constituted by the Ministry of Commerce and Industry  |
|-----|------|--|
|     |      | tudy the existing SEZ policy in India and submitted recommendation   |
|     | in N | Nov, 2018.   |
|     | (A)  | Chokle led Committee   |
|     | (15) | Baba Kalyani led Committee   |
| ,   | (C)  | Panchi led Committee   |
|     | (D)  | Dharwad led Committee  |
|     | (E)  | Answer not known   |
|     |      |  |
| 53. |      | are fenced in, duty-free areas that offer warehousing, age and distribution facilities for trade, transshipment and re-export rations. |
|     | (A)  | Special warehouse  |
|     | (B)  | Warehouse  |
|     | (C)  | Super Economic zone  |
|     | (10) | Free Trade Warehousing zones   |
|     | (E)  | Answer not known   |
|     |      |  |
| 54. | plan | OPFI guidelines suggested that the terminology of City Development be renamed as ———————————————————————————————————                   |
|     | (A)  | Perspective plan   |
|     | (B)  | City Sanitation plan   |
|     | (C)  | Zonal Development plan   |
|     |      | City Investment plan   |
|     | (E)  | Answer not known   |
|     |      |  |

| 55. | National Rural Health Mission seeks to reduce the following in our Country   |  |  |  |  |  |  |
|-----|--|--|--|--|--|--|--|
|     | <ul> <li>(i) Maternal Mortality Ratio</li> <li>(ii) Infant Mortality Ratio</li> <li>(iii) Total Fertility Rate</li> <li>(iv) Sex Ratio</li> </ul>  |  |  |  |  |  |  |
|     | (A) (i), (ii) and (iv) (b) (i), (ii) and (iii) only (c) (i) and (ii) only (d) (d) (d) (e) (e) Answer not known (e) (f) (ii) and (iii) only (f)                                     |  |  |  |  |  |  |
| 56. | Identify the thrust areas of AMRUT mission from the following  (i) Water supply  (ii) NMT  (iii) Health  (iv) Public Transport Facilities  (v) Power   |  |  |  |  |  |  |
|     | (A) (i), (ii) and (iv) only (B) (ii), (iii), (iv) and (v) only (C) (i), (ii) and (iv) only (D) (iii) and (v) only (E) Answer not known   |  |  |  |  |  |  |
| 57. | Number of cities that will be covered under AMRUT (Atal Mission for Rejuvenation and Urban Transformation) scheme by the Government of India is  (A) 400 (C) 300 (D) 100 (E) Answer not known                          |  |  |  |  |  |  |
| 58. | One of the following is not a Milestone of Swach Bharat Mission  (A) Elimination of open defecation  Penalise inefficient waste collection  (C) Transportation of waste  (D) Scientific disposal  (E) Answer not known |  |  |  |  |  |  |

- 59. Modulus of Elasticity of concrete is
  - (A) 5700 fck N/mm<sup>2</sup>
  - (B)  $5700 \text{ (fck)}^2 \text{ N/mm}^2$
  - $\sqrt{5700} \sqrt{\text{fck N/mm}^2}$ 
    - (D)  $5700 \times 10^5 \text{ N/mm}^2$
    - (E) Answer not known
- 60. The tensile strength of concrete is expressed as
  - (A)  $f_{cr} = 0.72 \sqrt{fck}$

(B)  $f_{cr} = 0.71\sqrt{fck}$ 

 $f_{cr} = 0.70\sqrt{fck}$ 

- (D)  $f_{cr} = 0.69 \sqrt{fck}$
- (E) Answer not known
- 61. For a building on the side of a busy street, where the ordinary scaffolding will obstruct the traffic on road, the type of scaffolding provided is
  - (A) Brick layer's scaffold
  - (B) Mason's scaffold
  - (C) Steel scaffold
  - Needle scaffold
  - (E) Answer not known
- 62. Quoins are
  - (A) The place where two or more stones meet
  - (B) The internal corner or angle of a wall
  - The external corner or angle of a wall
  - (D) A projection provided on the inside face of the wall
  - (E) Answer not known

- Gypsum is added in the manufacture of Portland cement in order to 63.
  - (A) Decrease the setting time of cement
  - Increase the setting time of cement (B)
    - Decrease the burning temperature (C)
    - Increase the grinding time (D)
    - (E)Answer not known
- In analysis of rates, contractor profit is taken at the rate of 64.
  - (A) 4%
  - 5% (B)
  - (0) 10%
    - (D) 15%
    - Answer not known
- PERT stands for 65.
  - Programme Estimation and Reporting Technique (A)
  - Process Estimation and Review Technique (B)
  - Programme Evaluation and Review Technique
    - Planning Estimate and Resulting Technique (D)
  - Answer not known (E)
- In PERT analysis The standard deviation ( $\sigma$ ) is given by —— 66. Given that  $t_p$  = Pessimistic time,  $t_o$  = Optimistic time,  $t_m$  = Most likely time
  - (A)  $\sigma = \sqrt{\frac{t_m t_o}{6}}$

(C)  $\sigma = \sqrt{\frac{t_p - t_o}{6}}$ 

- (B)  $\sigma = \frac{t_p + t_o}{6}$ (D)  $\sigma = \frac{t_p t_o}{6}$
- Answer not known (E)

- 67. One of the types of information collected in vital survey is
  - (A) Forest and other natural vegetation
  - (B) Mines and other location
  - (C) History of the past growth of population
    - (D) Location and classification of historic buildings
    - (E) Answer not known
- 68. The sum of the interior angles of a closed traverse is
  - (A)  $(2n+4) 90^{\circ}$
  - (B)  $(2n-4) 90^{\circ}$
  - (C)  $(2n-8) 90^{\circ}$
  - (D)  $(n-4) 90^{\circ}$
  - (E) Answer not known
- 69. In visible region, the Red light is having a wavelength range of  $\mu$ m.
  - (A) 0.52 0.60
  - 0.63 0.69
  - (C) 0.76 0.90
  - (D) 0.90 1.55
  - (E) Answer not known
- 70. In any case, to get a well proportioned or well-conditioned triangle in chain surveying, no angle should be less than
  - (A) 20°
  - (30°
  - (C) 40°
  - (D) 45°
  - (E) Answer not known

71. Match the items in List I with List II and select correct answer.

List I

List II

- (a) Struture in a truss 1. Bending
- (b) Tie in a truss
- 2. Compression

(c) Beam

- 3. Torsion
- (d) Rotating shaft
- 4. Tension
- (a) (b) (c) (d)
- (A) 1 3 2 4
- (2) 2 4 1 3
- (C) 3 4 2 1
- (D) 2 4 3 1
- (E) Answer not known
- 72. Tendon splices are required in
  - (A) Hoyer's long line method of prestressing
  - (B) Short span prestressed members
  - Long span prestressed members
    - (D) Both (A) and (B)
  - (E) Answer not known
- 73. Maximum permissible shear stress given in IS 456 1978 is based on
  - (A) Diagonal tension failure
  - Diagonal compression failure
  - (C) Flexural tension failure
  - (D) Uniaxial compression
  - (E) Answer not known

74. Match List - I (Type of structure) with List - II (Static indeterminacy) and select the correct answer using the codes given below the lists:

Number of members = m, number of joints = n, number of reaction elements = r

List I

List II

- (a) Plane frame
- 1. m+r-3n

- (b) Space truss
- 2. 6m+r-6n
- (c) Space frame
- 3. 6m+r-3n
- 4. 3m+r-3n

Codes:

- (a) (b) (c)
- (A) 1 2 3
- (B) 4 3 2
- (C) 2 1 3

- (E) Answer not known
- 75. If a simply supported beam carrying a load whose intensity varies uniformly from zero at one end to 'W' per unit run at the other end, then the maximum bending moment is equal to
  - (A)  $\frac{WL^2}{8}$
  - (B)  $\frac{WL^2}{12}$
  - (C)  $\frac{WL^2}{24}$

(E) Answer not known

| 76.      | The value of Young's modulus of soil $(E_S)$ used in immediate settlement                       |   |
|----------|---|---|
|          | equ   | ation can be found out using  |
|          | (A)   | Compression test (B) Direct shear test  |
|          | (C)   | Plate load test Triaxial test   |
|          | (E)   | Answer not known  |
| 77.      |   | a compact building site covering an area of 0.4 Hectre number bore es required for soil investigation as per I.S. 1892- are |
|          | (A)   | 1 (B) 4   |
|          | 10  | 5 (D) 3   |
|          | (E)   | Answer not known  |
|          |   |   |
| 78.      | Unconfined compression test is applicable only to   |   |
|          | (A)   | fully saturated, non-fissured clays   |
|          | (B)   | unsaturated clays   |
|          | (C)   | partially saturated clay  |
|          | (D)   | any type of clay  |
|          | (E)   | Answer not known  |
|          |   |   |
| 79.      | Assertion [A]: The effective stress is equal to the total stress minus the pore water pressure. |   |
|          | Rea   | son [R]: The effective stress controls the volume changes and shearing resistance of soil.                                  |
|          | (A)   | Both [A] and [R] are true and [R] is the correct explanation of [A]   |
|          | (B)   | Both [A] and [R] are true but [R] is not the correct explanation of [A]   |
|          | (C)   | [A] is true but [R] is not true   |
| <b>A</b> | (D)   | Both [A] and [R] are not true   |
|          | (E)   | Answer not known  |
|          |   |   |
