PART - I

ENGLISH COMPREHENSION

Directions (81-90) Read the following passage and answer the questions. The words/phrases are given to help you locate the answer. This was supposed to be a temporary measure when monetary policy was expected to get back to normal after Lehman Brothers failed. Central banks were expected to edge away from near-zero interest rates with 2015 almost in sight. Federal reserve had to raise rates while other central banks are still on easing than. Sweden's Riksbank had a quantitative easing programme last

but is still bad news. This explains the rather bumpy ride that stockmarkets have had in 2015. The lack of profit growth makes it hard for markets to surge ahead. But without higher interest rates, or evidence that big economies are slipping into **outright** recession, share prices are unlikely to collapse. Central banks may have helped stockmarkets in an era of low growth by making other assets less attractive; the result was a positive shift in share valuations. But slow growth hasn't gone away.

81. Which of the following is true in the context of the passage ?

(1) Central banks in developed countries are unnecessarily delaying raising interest rates.

(2) The IMF has issued strong warnings to China's central bank to lower inflation.

(3) IMF and developed economies are needlessly alarmed about the health of China's economy.

(4) Asian economies are uniformly raising interest rates to control inflation.

(5) None of the given options is true in the context of the passage.

85. Which of the following best describes the health of the stock markets in 2015 ?

(1) Many stock markets crashed on account of the state of China's economy.

(2) Stock markets are in a state of flux, shaped on account of the regulations of central banks.

(3) Stock markets showed uneven growth.

(4) Stock prices are in a state of 'collapse' as big economies are headed for a recession.

(5) None of the given options describes the health of the stock markets in 2015.

86. According to the passage, which of the following is the factor that has/have impacted the economic growth in the world?
